

**Becker County Community Health** has been using Champ products since July 2001. Nightingale Notes allows them to enter charts with much accuracy, and updating records is a cinch. Today, the staff uses Nightingale Notes for many of its features including third party billing, growth charts, and reports. The nurses no longer have to deal with paper charts as Nightingale Notes allows them to enter data electronically.

One of the major features that the staff at Becker County Community Health appreciates having in Nightingale Notes, is the ability to scan files into charts. In addition, when the staff goes out on the road, they appreciate having Nightingale Notes readily available, allowing them to look up client information while being away from the office.

The staff at Becker County Community Health is able to work more efficiently because Nightingale Notes allows them to do charting electronically, instead of doing paper charts as they have in the past.

Thank you to Becker County Community Health for staying on the leading edge of public health charting and for their Champ patronage.
