

**Bismarck Burleigh Public Health** has been a part of the Champ family since August 2011. They switched to Nightingale Notes because they were in need for an electronic record system. Having had an “all paper” system before, they were glad to switch to Nightingale Notes. Nightingale Notes makes their job easier, ***“I appreciate not having to write a medication list in 3 different places – once it is in the record it goes to the orders, etc. Makes for less errors,”*** stated Connie Griffin, their supervisor.

Most of the popular features in Nightingale Notes that the Bismarck Burleigh Public Health nurses are using is the client charting and admissions. The nurse can retrieve a client’s record at any time to view the necessary information. Nurses enjoy using Nightingale Notes on their laptops when they visit their patients at homes. The software is user-friendly and well organized.

Thank you to Bismarck Burleigh Public Health for staying on the leading edge of public health charting and for their Champ patronage.
